Custom Certificates

Custom Certificates

Custom Certificates

- We now have the ability to create custom certificates for your earners to download and print.

- In theory, you can have a different certificate template for each badge.

- For now, creation of the certificate requires a Customer Success Manager (CSM) to help you.

How SAP made it easy for us

A mock-up

First, they provided a mock-up of what they wanted.

Notice how they specified fonts, colors, and placement.

A blank template

SAP also provided a blank template in png form.

If you provide us with a png that is already sized for US Letter (11 x 8.5 inches) with a resolution of at least 300 px, this makes the creation process much easier.

THE BEST RUN SAP

SAP Global Certification

We hereby confirm that

is certified as

Issued by: SAP SE

Verify: www.youracclaim.com/

# The original simple certificate

Recreating the original template

When we create a custom certificate, we'll also recreate the original simple version.

Credly

The admin view

Once custom printing is enabled

With the feature enabled, you'll see the option to allow for printing at the badge template level under **Settings**. You can select which certificate template (if you have more than one).

Anyone with permission to edit a badge template will see this feature.

Credly

The earner view

Print feature enabled in sharing
